

SCIENCE OPTION LABORATORIES INC.

PurTect® topical skin care and protectant is an innovative tattoo and tattoo aftercare product formulated by experienced chemists, biologists & skin care experts. PurTect contains no parabens, fragrances, dyes or alcohol. PurTect lubricates, moisturizes and purifies skin. Designed to reduce irritation, swelling and to keep redness down, while also cleaning and soothing. A unique combination of essential skin nourishing Vitamins A and E, plus moisturizing Squalane, and the highest grade of pharmaceutical grade Petrolatum, help PurTect create a protective and breathable film barrier without clogging pores, allowing skin to breathe as it heals. PurTect also contains a low but effective amount of Chloroxylenol (PCMX), a proven antimicrobial ingredient shown to be effective against bacteria and viruses without burning or irritating the skin. Only a small amount of PurTect is needed before, during and after the tattoo. Follow your Tattoo Artist's instructions for ideal aftercare results.

PurTect is manufactured in Canada under aseptic cGMP guidelines, and strict Quality-assurance standards in compliance with Health Canada and FDA regulations. PurKlenz antiseptic skin cleanser NDC 49436-291-01 / DIN 02440458, PurTect skin care ointment and PurSan aftercare skin cleanser work together to Prepare, Protect & Preserve your Body Art.

PurTect 118mL was designed for Artists to use while tattooing to reduce irritation, swelling and keep redness down. PurTect cleans and soothes and contains a unique combination of essential skin nourishing Vitamins A and E, Squalane a plant based emollient and moisturizer, plus the highest pharmaceutical grade of Petrolatum. PurTect also contains a low but effective amount of Chloroxylenol (PCMX), a proven antimicrobial ingredient shown to be effective against bacteria and viruses without burning or irritating the skin. PurTect provides a protective and breathable film barrier without clogging pores thus allowing the skin to breathe. Only a small amount of PurTect is needed before, during and after the tattoo. PurTect contains no parabens, fragrances, dyes or alcohol. Follow your Tattoo Artist's instructions for ideal aftercare results.

PurTect 20mL tubes are a smaller after-care format preferred by Artist. Designed for use on a new Tattoo to reduce irritation, swelling and keep redness down, while also cleaning and soothing. PurTect contains a unique combination of essential skin nourishing Vitamins A and E, plant based emollient and moisturizer Squalane, and a low but effective amount of Chloroxylenol (PCMX), a proven antimicrobial ingredient shown to be effective against bacteria and viruses without burning or irritating the skin. PurTect provides a protective and breathable film barrier without clogging pores thus allowing skin to breathe as it heals. Only a small amount of PurTect is needed before, during and after the tattoo. PurTect contains no parabens, fragrances, dyes or alcohol. Follow your Tattoo Artist's instructions for ideal aftercare results.

According to the experts at Bio Science Labs in Montana, USA:

- the wound care industry suggests keeping a wound clean and hydrated to promote healing and avoid infection.
- a mild antimicrobial product will prevent flora from growing back after a wound.
- products containing PCMX within the prescribed limits, and especially at the relatively low level contained in PurTect, are generally safe to use on wounds for an extended period of time.
- the PurTect formulation will allow oxygen to pass through the thin barrier film it creates, and along with mild antimicrobial action and hydration (moisturizing) it will help protect and heal the wound.
- a "breathable" barrier patch can be placed temporarily over a tattoo wound in combination with a small amount of PurTect ointment.
- BSL evaluated PurTect for In-Vitro Cytotoxicity using ISO 10993-5 Direct Contact Test and considers PurTect non-cytotoxic.

Ingredients:

ALOE BARBADENSIS LEAF EXTRACT	Anti-irritant and anti-inflammatory soothes minor burns and wounds.
CHLOROXYLENOL (PCMX)	Antibacterial. Antimicrobial.
COCOS NUCIFERA (Coconut) OIL	Moisturizer. Lubricant.
PARAFFIN	Moisturizer. Emollient.
PARAFFINUM LIQUIDUM	Emollient to soften & sooth dry or irritated skin
PETROLATUM	Emollient. Anti-irritant.
PROPYLENE GLYCOL	Humectant. Moisturizer.
RETINYL PALMITATE (Vitamin A)	Vitamin A helps the skin repel bacteria and viruses more effectively.
SQUALANE	Plant based, non-irritating emollient and moisturizer.
TOCOPHERYL ACETATE (Vitamin E)	Vitamin E antioxidant and anti-inflammatory calms and hydrates sensitive skin.
